Team Name: sddec21-11
Team Members: Colin Firth, Tary Todd, Aaron Martin, Chris Johannsen, Dale Young, Addison Ulrick
Report Period: Jan 25-Feb 14

Summary of Progress in this Period

- Have met with our faculty advisor and received an overview of the project.
- Were given the previous team's repository along with additional data such as manuels to the hardware we will be working with.
- Have pushed the previous team's code onto our own repository.
- Started reviewing and understanding the source code and project overall.

Pending Issues
- Training for lab equipment will be needed at some point in the future
- The previous groups used some unintuitive obfuscation in their C# code. Prof. Bigelow gave us the contact information for an undergrad who spent some time documenting and commenting the code.

Plans for Upcoming Reporting Period
- Have a meeting with a member of the previous team in order to get a better understanding of the details that have been made with this project so far.
- Continue to review and understand the source code and the project overall.
- Start to refactor the source code and convert from C# to MatLab.
- Start design document due March 9th
- Prepare for Lightning Talk due Feb 28th
- Fill out individual reflections due Feb 22nd
